

Overall very successful!!

#### First impressions

- Type faces & pairings for both versions are very successful
- Very appropriate color palette
- Use of images are appropriate

#### Preference/improvement

- Enjoyed the first version than the second one (prefer using big, eye catching images)
  - I especially appreciate darker background + white text
- I do think the carousel works better than listing
  - For listing, I think the descriptions can get shorter (as of now feels a bit overwhelming to read)
  - I appreciate how you gave hierarchy in mockup B for artwork title, date/location, and material
- The navigation for the first version seems more clear and successful
  - Clear separation of home button & interior page navigation
  - However, if you are going to use all caps for the website title (in navigation bar), I think you should treat other headings of the same font in a similar way ("works of michelangelo," titles of artworks)
